I give my permission to the dentist to make any/all changes and additions as necessary once they've been discovered and discussed. (Initial: _____)

X-Rays
I understand x-rays are necessary for proper diagnosis and treatment. (Initial: _____)

Fillings
I understand that care must be exercised in chewing on fillings, especially during the first 24 hours, to avoid breakage.
I understand that a more expensive filling may be required due to additional decay than what could be seen by the x-ray and that significant sensitivity is a common aftereffect of a newly placed filling. (Initial: _____)

Local Anesthetic
Anesthetizing agents (medications) are injected into a small area with the intent of numbing the area to receive dental treatment. They also can be injected near a nerve to act as a nerve block causing numbness to a larger area of the mouth beyond just the site of injection. Risks include but are not limited to.' It is normal for the numbness to take time to wear off after treatment, usually two to three hours. This can vary depending on the type of medication used. However, in some cases, it can take longer, and in some rare cases, the numbness can be permanent if the nerve is injured. Infection, swelling, allergic reactions, discoloration, headache, tenderness at the needle site, dizziness, nausea, vomiting, and cheek, tongue, or lip biting can occur. Potential benefits: The patient remains awake and can respond to directions and questions. Pain is lessened or eliminated during dental treatment. (Initial: _____)
